

# Application Solutions

## Client-Centered, Flexible, Tailored

*CBTS provides custom application-related services with a flexible and tailored approach.*

### On-Demand World-Class Resources

Partner with CBTS to help your organization accomplish your application development objectives. We maintain a deep bench of technical resources that act as your trusted advisors, smart hands and extended staff. Our Application Solutions are tailored to deliver world-class development expertise that you need when you need it.

### Application Services

- Business Analysis
- Project Management
- Managed Staff Augmentation
- User Interface / User Experience Design
- Application Development
- Collaboration & Integration

### Client Benefits

#### Partner with Experts

- You hand over to us the challenging and expensive responsibilities involved in building a team of experts.
- We utilize certified and proven experts to manage your solution from the discovery phase to implementation and beyond.

#### Eliminate Costs of Developing the Solution In House

- As a Microsoft Gold partner, we have the development and testing platforms configured in our Virtual Data Center (VDC).
- We are licensed to develop and test against all Microsoft products.
- Our team of experts is equipped with the hardware and software necessary to hit the ground running.

#### Continual Support

- CBTS will perform a knowledge transfer to your internal development staff after implementation.
- CBTS will define a 24x7x365 support structure with an escalation process where you always have access to our experts.

**Consulting, covered.**

We can help with any or all aspects of your software development life-cycle.

### Business Analysis

Our highly skilled architects and business analysts will work with you to define a detailed blueprint based on your vision. We specialize in taking an agile approach that provides our customers complete visibility into the work in progress and the ability to evaluate and change throughout the development lifecycle.

### Project Management

Our experienced project managers are actively involved from project ideation to implementation. Their expertise and skills ensure that your project moves forward as expected through the five phases of the project management lifecycle: initiating, planning, executing, monitoring and controlling, and closing. They will also keep the three factors: time, cost and scope in equilibrium for successful completion of your project.

### Managed Staff Augmentation

Our clients have the flexibility of extending their internal technical staff without the overhead involved in filling seats, and providing additional equipment and licenses on site. CBTS is able to provide and manage additional resources for the customer in our office while they seamlessly become your extended staff.

### User Interface/Experience Design

CBTS has the ability to design a solution with the users in mind while factoring human / application interactions. Our talented designers will help you at the design stage to properly lay out their solution and create a world-class look and feel.

### Application Development

- Web
- Desktop
- Mobile
- Reporting
